

Antique Maritime Sextant, Brass, Admiralty, Naval, Instrument, Victorian, C.1900

DESCRIPTION

Our Stock # 18.6514

This is an antique maritime sextant. An English, brass admiralty three circle naval instrument, by J.Coombes of Devonport, dating to the Victorian period, circa 1900.

- Appealing Victorian scientific instrument
- Displays a desirable aged patina
- Brass shows sought after weathering and great patination
- Mahogany box in good order with fine grain interest
- Radius sextant moves around its arc to aid navigation
- Vernier adjustment with pleasingly knurled edges
- Folding UV filters to protect against daytime sunlight
- Broad mahogany handle to base for a secure grip in all weathers
- Inscribed 'J.Coombes. Opticians & Admiralty Agent, Devonport'
- Carry case dressed with fascinating rotating latches
- Supplied with three original viewing scopes
